Product Description

Truck Tanker - 594 Components

If there is one vehicle that helped shape the industrial revolution in all its facets, it is almost certainly the tanker. This product, of the chemical and oil industry that flourished over the years, is the hallmark of a special vehicle that can be loaded with gases, liquids or bulk materials. All the more interesting appears the high-quality wooden model of the brand manufacturer UGEARS(R), which in terms of model making with the present "UGM 11 truck" makes a considerable contribution to the understanding of technology.

Based on the steampunk style of a postmodern art world, the wooden construct features a 4-cylinder rubber band engine whose performance can be precisely tracked. The open construction design allows a good view through the openwork wooden surfaces. In conjunction with this, the visual potential of pure mechanics is emphasized and artfully painted. These models from UGEARS(R), which can be assigned to retrofuturism, present technology on the smallest scale and do so in a rather impressive way. The small work of art can also open its loading hatch via an integrated rotating mechanism and can be filled with a 0.33 liter standard can. Thus, your desk will always be supplied with liquid.

Warning! Not for children under 3 years.

- Number of components: 594
- Setup time: 14-16 hours
- Model size: 33 x 18 x 12.5 cm
