Product Description

Motorcycle VM-02 - 189 Components

There are things that can't be copied and there are things that make every technophile's heart beat faster just because of their presence. One of these products is certainly the 3D model "Motorcycle VM 02" from UGEARS(R), a manufacturer of mechanical models.

In reference to the good old Easy Rider times as well as an aura that only a gasoline-crazy asphalt cowboy can really understand, the UGEARS(R) brand presents the model of a chopper as one(s) have never seen it before. The construct, made entirely of wood as well as a rubber engine, makes use of the retro perspective of steampunk, which tries to reinterpret the idea of the future that prevailed in the past. As an art object, the present kit thus approaches postmodernism and a retrofuturism triggered by cyberpunk.

This has been taken to the extreme in the 3D model "Motorcycle VM 02", so that the technology can be reproduced in detail from the piston to the engine. In fact, the style of the brazen wooden model looks brute and visually powerful, so that the machine itself can be compared to a roadworthy work of art.

Warning! Not for children under 3 years.

- Number of components: 189
- Setup time: 3-4 hours
- Model size: 25.8 x 8.4 x 10.5 cm
