Product Description

U-9 Grand Prix Car - 348 Components

The great era of Grand Prix car races on circuits began already at the beginning of the 20th century. Old photos give an idea of the atmosphere of the races of that time, when the sleek automobiles roared past the spectators and they held their breath during the daring overtaking maneuvers. With the U-9 Grand Prix racing car from Ugears, you can admire and touch the elegance, dynamics and sophisticated construction of the vintage racing cars up close. We have carefully modeled the U-9 model after the noble bodies from the early days of racing.

Each of the numerous details has been lovingly crafted, from the radiator grille to the 8 cylinder engine and spare wheel. A handbrake, a small, hinged trunk and a crank are also part of the kit. The design delights modelers and collectors alike. As always with Ugears models, this product also has mechanics and can be set in motion: The 16 valves are functional and thanks to the powerful rubber engine, the car starts its first race.

Warning! Not for children under 3 years.

- Number of components: 348
- Setup time: 6-7 hours
- Model size: 35 x 9.5 x 13 cm
