Product Description

Motorcycle Scrambler UGR-10 - 380 Components

The "scramblers" that became popular in the motorcycle scene in the 1950s resemble enduros and motocross machines that always attracted attention with their unusual tire profile and strong suspension cables. The modernizations, which have matured to roadworthiness, are therefore quite something and stand out brutally through pure sportiness. The model manufacturer UGEARS(R) devoted all its attention to this racy design and developed an artful retrospective made to measure.

The MOTORRAD SCRAMBLER UGR-10 with or without sidecar is thus an eye-catcher par excellence and sparkles with engine power and strength. The detailed replica of a boxer engine thus makes engine sounds visible and cultivates the retrofuturistic style of steampunk. In this context, the SCRAMBLER UGR-10 offers everything that distinguishes the models of UGEARS(R): Play, fun and visual finesse. Any fan of modeling will be aware that the rubber motor-driven vehicle is extremely capable of driving, thanks to the wind-up belt clutch. The semi-open design allows any display of the powerful mechanics, which matured in 380 sustainable wooden parts to a unique vehicle. This still life is thus a postmodern showpiece for any display case.

Warning! Not for children under 3 years.

- Number of components: 380
- Setup time: 8 hours
- Model size: 22 x 16 x 11.5 cm
