Product Description

Café - card game (DE), for 1-4 players, ages 10+

Brazil was one of the largest coffee producers in the world as early as 1800. The first coffee seeds entered the country secretly and on the orders of the king. Drinking coffee soon became part of Portuguese culture. At the beginning of the 20th century, coffee beans from different growing areas provided exquisite blends. This entertaining game skillfully brings the process from growing the coffee beans to drying and roasting to delivery to the exquisite coffee house or your own warehouse on the gaming table. Each player receives a six-field card per round. These must be built into your own display in a tactically smart way so that as many of the same fields as possible are adjacent to one another. Because then production really gets going! However, as part of the previous fields is always covered when you put down the new card, good planning and weighing are crucial. Who succeeds best with his actions to create and control the optimal supply chain for coffee? A small game, but with a big challenge and a lot of enjoyment.
