Product Description

Puzzle: Krypt Black, 736 pieces (DE)

For long-term puzzlers, persevering, sticking to it - and everyone who never gives up! Difficult puzzle for adults and children from 14 years - puzzles without a picture, just according to the shape of the puzzle pieces.

You see that you see nothing. KRYPT is the ultimate challenge for all puzzle fans. The unmistakability does not lie in the printed motif: the puzzle is puzzled solely according to the shape of the parts. Krypt therefore consists of completely individually shaped parts

Every puzzle fan should show their colors at some point and face an unprecedented challenge! Go new ways with Krypt Black and take the ultimate step towards becoming a professional. How is that supposed to work? You have to say goodbye to the classic motif puzzle! That doesn't exist here and that's exactly what makes it so attractive. Now it's time to get to the grandiose variety of shapes of the consistently pink puzzle pieces that are only available from Ravensburger - with a pinch of patience and lots of puzzle fun, you will find yourself in a real puzzle wake in no time, from which you don't want to emerge. A must for everyone who is up to the ultimate challenge or who is looking for distraction and relaxation in a very crazy way.

Anyone who bites through here can rightly claim that they have achieved the almost impossible.

Warning: not required according to Toy Regulation.
