Product Description

Im Mondlicht, extension for: Photosynthesis (DE), for 2-4 players, ages 10+

In the strategic family game photosynthesis, you observe the course of the sun in order to carry out your actions at the right time. Only those who use their sun points wisely will be successful. With the expansion In the moonlight, the moon and the forest animals are added as additional play elements. You have to plan ahead when you will activate your animals' abilities, where you will use them on the game board and how you will move them.

With this extension for photosynthesis, the forest is bathed in moonlight. The sun and moon create a new rhythm of life in the forest. At night, its residents use the moonlight for their special skills.

The base game is required!
