## Product Description

Colorino, children's game, for 1 player, ages 2+

Colorino is a classic among the pegging games. With the colorful picture templates and the 40 sturdy plug-in stones, this color learning game ensures a lot of fun for children from 2 years of age. A transparent pegboard is placed on top of the motifs. Now it's time to choose the matching colored stones and put them in the right place. In addition to learning colors, the children train their fine motor skills by attaching the colored stones and increase their ability to concentrate.

The large, robust stones are suitable even for small children. The picture templates are printed on both sides: one side shows a colorful motif, the back the same motif as a black and white template. The children can design these freely and thus let their creativity and imagination run free. The ingeniously simple game principle inspires boys and girls alike and is fun up to preschool age.

Warning not required according to Toy Regulation.

- Player: For 1 player, ages 2+
- Duration: 10 - 15 minutes
