## Product Description

Warhammer - Adventure in Übersreik (anthology), book, 128 pages (DE edition)

Six grim and dangerous adventures in County Übersreik!

Welcome to County Übersreik, where the brisk lock step of the state troops echoes through the cobbled streets while old oaths of loyalty are put to the test behind closed doors. Opportunities abound behind every door.

This anthology offers six scenarios for the Warhammer Fantasy RPG set in County Übersreik. These can be played as individual, independent adventures, inserted into an existing campaign or linked to a separate campaign with which the County of Übersreik can be explored.

Selected tips, tricks and new threats are presented in order to connect the adventures even more closely and organically. Also included are options for more experienced characters to make these grim and dangerous adventures even more deadly.

Oversreik Adventure contains:

- If looks could kill: Legends say that the beast from the local mud was on the prowl in the swamps during Übersreik, but only a few believe the stories ...
- The mad people of Gotheim: The village of Gotheim is in ruins and the villagers are falling apart. What may be the reason for this?
- Heart made of glass: A powerful noblewoman takes the characters into her service to investigate a mysterious murder, an insidious cult and the intentions of a relentless witch hunter.
- Slaughter in Saliva: A nasty disease is spreading in the slums of Übersreik and the characters get caught up in it.
- Witch bait: Cordelia Wesseling needs a diversion. Fortunately, a few volunteers are just strolling into their pharmacy.
- A bunch of guilty parties: someone is sabotaging traveling coaches, and a local investigator thinks he knows who is behind it.

Warning! Not suitable for children under 36 months.
