Product Description

Furnace: The Age of Industrialization - Card game, for 2-4 players, from 10 Years (DE Edition)

The technological revolution brings us progress and you want to be at the forefront! Your time and effort are the most precious thing there is, and they are limited. The world is changing. You change the world too!

In Ivan Lashin's engine building game with auction mechanism for 2 to 4 players, ages 10+, you will become entrepreneurs in the 19th century. You are acquiring and modernizing factories, extracting and processing raw materials and trying to amass the most money in this way.

If you place the highest bid on a factory, you will also receive it, while all other bids will be rewarded with subsidies. During production, you extract and process raw materials in the factories you have bought in order to sell them later. By cleverly using your production chains, you optimize your factories and increase your efficiency.

Attention! Not suitable for children under 36 months. Legal minimum age: 10, legal maximum age: 99

- Number of players: 2-4
- Age: from 10 years
- Playing time: 30-60 minutes
