Product Description

Prism Power Turboshift Acrylic Paint 20ml Bottle

With a wave of his hand, Usage Tsukino conjured up the command to create Moon Prism Power and wrapped himself in ribbons of vibrant colour. Prism power is a type of turbo shift we call Zenishift. In the bottle it is pink, but when applied over white it is a peachy pink with blue highlights reminiscent of Sailor Moon's fingernails, and when applied over black it is a blue with a pink shift.

Turboshift colours are made with tiny glass-like flakes that act like millions of tiny prisms in the paint. Depending on the nature of the flakes, different colours are refracted or reflected in the light. In layman's terms, this means that the paint changes colour depending on the light under which you look at it and the angle at which you hold it to that light.

The paint was developed for use with the airbrush, but can also be applied by hand.

Caution. Not suitable for children under 36 months.

- Size: 20 ml
- Colour: Prism Power
