from **47,96 EUR**

Item no.: 347886
shipping weight: 0.80 kg
Manufacturer: UGEARS

Product Description

Aquarium wooden model kit

A dream becomes reality. If you look at the new wooden model kit from UGEARS®, you will be reminded of films like Hugo Cabret and other classics. These show sequences of the silent movie stage in excerpts and thus form a bridge between old and new. The "AQUARIUM" miniature work of art, consisting of a total of 325 individual parts, combines tradition with modernity and brings the marvel of technology to the fore.

Like all models of the brand manufacturer, the openwork, circular fish tank is also made of sustainable wood, which is assembled into a style icon of retro-futurism. The attractive still life can even be brought to life with a SWIM switch and triggers movement in the interior of the AQUARIUM. Small robotic fish and algae are set in rotation by a spring and other comprehensible mechanisms. Here, each cogwheel drive fits perfectly into one another and can thus interrupt a learning character. The art movement steampunk therefore meets a visual material that dresses every showcase excellently. The still life is therefore equally suitable for model makers, technology enthusiasts or art lovers.

- Number of components: 325
- Assembly time: 6 hours
- Model size: 23.5 x 23.5 x 20 cm
