Product Description

Cyberpunk Red: Night City Essential Set

The world has collapsed, the corporations have won and thrown their weight around. All that's left is a sense of style, your wire necessary to survive and toys like weapons and this dice set suited to rules of the Cyberpunk RED RPG (four d6 and two d10). This is your little helper on your way through Night City and don't forget, a single roll can change everything and even make you a cyber hero from scratch

Howdy cyberpunks and wannabes! So it seems the world has collapsed, the corporations have triumphed and thrown their weight around. All that's left is your sense of style, a few wires necessary for survival and toys like the guns and this set of dice. These dice are your teammates on the journey through Night City, where a single roll can change everything. This set will be your new talisman, lucky charm or unique gaming device. In Night City, it doesn't matter where you're from or what drives you, because all that matters here is your style and drive (and your toughness and vengeance, too). Now you are one of us, and this set of black polyhedra is your passport to new ventures in the world where everything ends, morality and forgiveness are forgotten; where, on the other hand, wheels are fastest, bullets are cheapest in history and a good repairman can fix anything for the right amount of money. This set is directly suitable for the rules of the Cyberpunk RED RPG. It consists of six multi-faceted dice (four d6 and two d10). The dice are black with red painting in intricately carved engravings. On the top surfaces is the sophisticated game logo of Cyberpunk.

We at Q WORKSHOP paint them red - if you know what that means.... Red paint in elaborate ornaments of course! There's no time to discuss it! Concentrate on defence, because it's war and cubes with sophisticated backgrounds, stylised as circuit boards, may be your last chance to survive. Die with dignity, not in vain with casual dice without style. This set can be your friend - the only friend to support you in your decisions! Look at them and live like there is no tomorrow and Trauma Team will not arrive in time!

Life goes on and Cyberpunk 2020 is just old glorious history. For that, Cyberpunk Red is newer and better made than anything in the past. It's a real upgrade! Only one thing hasn't changed - the most important rule in Night City: you have to shine your own light. That can be terribly difficult, though, because there are a lot of idiots biting their claws and pining for your spot. There are a lot of mirror-like, cloned guys and gals who want to be something more, something better and fancier. That's the truth of cyberpunk - style over substance, envy over reason. You shine or you go away, Night City doesn't need losers and cowards. Typical dice are for all those little simpletons who rob markets and are real funny piglets - fluffy, cute and quick to die.

You need to be different, you're a cyberpunk - more than an ordinary human with the typical red in your veins and the chrome outside, with fancy cyber wires and flashy weapons. That's why you should be stylish like the "man in red", wearing the classiest black bulletproof suit you could find, and have your veins filled with real, cold chrome so you can make quick decisions in firefights. Only chrome can give you the power to be cold as stone and dangerous as living mercury. That's why our cubes are black and red, like the essence of cyberpunk that you carry within you. Have a great night in the Night City!

Caution! Not suitable for children under 36 months.

- Weight (kg): 0.06
- Material: plastic
- Number of dice: 6
- Colour of dice: Red
- Colour of painting: Black
