## CH-47 Chinook, model, 815 parts, 7 years and up

from **29,03 EUR**

Item no.: 358817  
shipping weight: 1,30 kg  
Manufacturer: COBI

### Product Description

The CHINOOK is a powerful twin-engine multi-purpose military helicopter that has been in continuous production since 1961. Its characteristics are its banana-like shape and two propellers rotating in opposite directions, which made it possible to get rid of the vertical rotor. All the considerable power is used for vertical lifting. The helicopter can fly at a speed of up to 278 km/h. It was created for transporting soldiers and military equipment. It has a very popular and effective design that has been associated with the US Army since the Vietnam War. To date, the number of users of this helicopter worldwide is considerable.

From the COBI kit you can build the carefully designed 1:48 scale of the extremely popular American helicopter CH-47 CHINOOK. The model has been covered with high quality prints that will not wear out even during intense fun. The prints mimic the vehicle's paint job in USA colours and imitate the details of the CHINOOK. The helicopter is equipped with rotating propellers and an opening flap. A rope with a catch hook comes out of the bottom of the helicopter for added fun! Two pilot figures are also included.

Attention: not suitable for children under 36 months!

- 815 high quality parts,
- Made in the EU by a company with more than 20 years of tradition,
- Meets safety standards for children's products,
- Fully compatible with other brands of building blocks,
- Blocks with prints do not smudge or fade during play or when exposed to temperature,
- Easy to read and intuitive instructions based on drawings and step-by-step directions,
