F-35B Lightning II Royal Air Force, model, 594 parts, 8 years and up

from **33,32 EUR**

Item no.: 358830
shipping weight: 0.90 kg
Manufacturer: COBI

Product Description

The F-35®B LIGHTNING II® is a single-seat, multi-role combat aircraft developed by Lockheed Martin Corporation. The F-35 Version B is a STOVL short take-off and vertical landing aircraft designed to replace those previously used by the United States Marine Corps and the British RAF and Royal Navy. With 594 high quality COBI building blocks, build the world's most advanced multi-role fighter, the F-35®B LIGHTNING II®, released under licence from mega-corporation Lockheed Martin. The set has been carefully designed in 1:48 scale. The specially designed blocks for this set have been covered with high quality prints. The characteristic cockpit is very realistically designed and can be opened to accommodate a figure of a pilot equipped with a helmet and oxygen mask with hose. When you buy a plane, you also build a display stand with a sign that says the name of the set! Thanks to the intuitive instructions, assembly is easy and will not cause any problems for less advanced builders. The set will meet the expectations of aviation, military and block enthusiasts. The F-35 will look great in your collection, no matter how old you are!

The F-35®B LIGHTNING II® has been in service since 2015 and is capable of close support, bombing and air combat missions. The F-35 is a supersonic aircraft with limited in-flight visibility. It has high reconnaissance and electronic warfare capabilities in detection, tracking, target acquisition and jamming. Armament is a 25 mm GAU-12/U gun mounted in the fuselage. Missile armament consists of up to 6 AIM-120 AMRAAM, AIM-9X Sidewinder or AIM-132 ASRAAM missiles in internal ammunition bays or two missiles and two 455 kg bombs. Weapons used to destroy ground targets can be JSOW or GBU-39 SDB bombs (4 in each bomb bay), Brimstone anti-tank missiles, cluster bombs or AGM-88 HARM anti-radar missiles. At the cost of losing stealth capability, armament can be hung from four underwing nodes and two at the ends of the wings (for AIM-9). The aircraft project is being jointly funded by the governments of the United States, the United Kingdom and other countries interested in purchasing this aircraft. The F-35®B LIGHTNING II® was built under the leadership of Lockheed Martin in collaboration with BAE Systems and Northrop Grumman.

- 594 high quality parts,
- Made in the EU by a company with over 35 years of tradition,
- Meets safety standards for children's products,
- Fully compatible with other brands of building blocks,
- Blocks with imprint do not deform or fade during play or when exposed to temperature,
- Clear and intuitive instructions based on drawings and symbols,
- 100% prints, no stickers,
- pilot figure,
- Block display stand,
- Sign with the name of the set,
- Model dimensions (L x W x H): 12.8" (32.5 cm) x 8.5" (21.5 cm) 3.9" (10 cm),
- Age: from 8 years
