F-35A Lightning II Poland, model, 580 parts, 7 years and up

from **35,31 EUR**

Item no.: 358831
shipping weight: 0.90 kg
Manufacturer: COBI

Product Description

The F-35@A LIGHTNING II® is a single-seat, multi-role combat aircraft developed by Lockheed Martin Corporation. The F-35 Version A is a conventional take-off and landing aircraft designed to replace the US Air Force's F-16 Fighting Falcon and A-10 Thunderbolt II aircraft. It is one of the US defence industry's hottest export products. Since the second decade of the 21st century, it has been used by the Air Force in many countries around the world. On 31 January 2020, Poland signed a contract for the purchase of 5th generation fighters. 32 F-35A conventional take-off and landing aircraft have been ordered, with the first deliveries starting in 2024. The first aircraft will be delivered to the air base in ?ask in 2026. Efforts are being made to speed up deliveries! Poland will become the 14th country in the world and the 10th NATO country to join the F-35 programme.

Use 580 of the highest quality COBI building blocks to build the world's most advanced multi-role F-35@A LIGHTNING II® fighter aircraft, licensed from defence mega-corporation Lockheed Martin. The set has been carefully designed in 1:48 scale. The specially designed bricks for this set have been covered with high quality prints. The characteristic cockpit is very realistically designed and can be opened to accommodate a figure of a pilot equipped with a helmet and oxygen mask with hose. When you buy a plane, you also build a block stand with a sign that says the name of the set!

Thanks to the intuitive instructions, the construction is easy and will not cause any problems for less advanced builders. The set will meet the expectations of aviation enthusiasts, military enthusiasts and block enthusiasts. The F-35 will look great in your collection, no matter how old you are!

The F-35@A LIGHTNING II® is the lightest version of the aircraft, capable of close support missions, bombing runs and typical air combat missions. A supersonic aircraft with limited in-flight detectability, the F-35 has high intelligence and electronic warfare capabilities in detection, tracking, target acquisition and jamming.

The small arms are a 25 mm GAU-12/U gun mounted in the fuselage.

Missile armament consists of up to 6 AIM-120 AMRAAM, AIM-9X Sidewinder or AIM-132 ASRAAM missiles in internal ammunition compartments or two air-to-air missiles and two 455 kg bombs. Weapons to destroy ground targets can be JSOW or GBU-39 SDB bombs (4 in each bomb chamber), Brimstone anti-tank missiles, cluster bombs or AGM-88 HARM anti-radar missiles. At the cost of losing stealth property, it is possible to hang armament from up to four nodes under the wings and two at the ends of the wings (for AIM-9).

The aircraft project is jointly funded by the governments of the United States, the United Kingdom and other countries interested in purchasing the aircraft. The F-35@B LIGHTNING II® was built under the direction of Lockheed Martin in collaboration with BAE Systems and Northrop Grumman.

Warning: not suitable for children under 36 months!

- 580 high quality elements
- Made in the EU by a company with over 35 years of tradition
- Meets safety standards for products for children
- Fully compatible with other brands of clamp-on blocks
- Blocks with imprints do not deform or fade during play or when exposed to heat
- Clear and intuitive instructions based on drawings and symbols
- 100% prints, no stickers
- Pilot figure
- Block display stand
- A sign with the name of the set
- Model dimensions (L x W x H): 32.5 cm (12.8") x 21.5 cm (8.5") 10 cm (3.9")
- Age: from 7 years
