### Product Description

The F-16 Fighting Falcon is a multi-role aircraft developed by the American company General Dynamics. It has been produced by the Lockheed Martin megacorporation since 1993. It is used by the air forces of several dozen countries around the world. The first F-16s were delivered to Poland on 8 November 2006 and are still in service today. The F-16 multi-role aircraft are the backbone of the Polish Air Force's combat aviation and are designed to perform tasks in the fight for air superiority, support other types of armed forces and conduct reconnaissance. Using 415 highest quality COBI building blocks, build the world's most famous fighter aircraft, the F-16® FIGHTING FALCON® in Polish colours, licensed under the armaments megacorporation Lockheed Martin. The set has been carefully designed in 1:35 scale. The blocks are covered with high quality prints. Polish "checkerboard" symbols look great on this model. The pilot's cabin, made in the new technology of two-colour injection, is the latest quality at COBI! The set includes a pilot figure with helmet plus an oxygen mask with hose. The whole set is complemented by a building block stand with a sign with the name of the set! Thanks to the intuitive instructions, building is easy and will not cause any problems for less advanced builders. The set will meet the expectations of aviation, military and block enthusiasts. The F-16 will look great in an adult collector as well as in a youth room. For Polish collectors, the Polish markings on the aircraft are a special addition, but also a reason to be proud! Create a story with COBI! Warning: not suitable for children under 36 months!
