36332 - Water-based modelling paint, bright red, silk matt, 18 ml

from **2,60 EUR**

Item no.: 365822
shipping weight: 0.10 kg
Manufacturer: Revell

📄 Product Description

The popular Aqua Color colours are now available in all 88 shades. The modeller no longer has to make any compromises and can use this acrylic colour system for all his colour needs.
The advantages of this colour system:

- Revell Aqua Color paints in completely new 18 ml containers are ideal for use
- Colours can be diluted with water
- Colours have a mild odour
- Paints are not flammable
- Colours contain practically no organic solvents
- 88 different colours
- Colours can be mixed with each other
- The paint is completely dry after 2 to 3 hours
- A colour can be painted over after only one hour, i.e. 6 times faster than with the enamel colours
- The new colours and the existing enamel colours (14ml) can be painted on top of each other without any problems after the drying time has elapsed, but they cannot be mixed with each other

The paint is also suitable for airbrushing. Please note the following:

- The paint must not be diluted too much
- Dilute a maximum of 20 to 25% with water
- It is best to dilute the paint with Aqua Color Mix. This serves, among other things, as a drying retarder and prevents the paint from drying too quickly in the spray gun
- Clean the spray gun with water immediately after use
- If the paint has already dried, the spray gun can also be cleaned with Airbrush Clean or Aqua Color Clean

For application with a brush:

- The colours can be brushed on and are characterised by high covering power
- Smooth surfaces after brushing - almost as good as with airbrushing
- Final result absolutely comparable to enamel colours
- Exceptional results when brushing

Warnings:

Preservatives, Agents de préservation: METHYLCHLOROISOTHIAZOLINONE, METHYLISOTHIAZOLINONE,BENZISOTHIAZOLINONE.
Caution. Only for children over 8 years. Use under adult supervision.
