Product Description

Notre-Dame Cathedral is one of the most fascinating buildings in the French capital and is considered one of the most impressive structures of the Gothic era. As a Masterpiece 3D puzzle with almost 300 pieces, the model is in no way inferior to its prototype. This is ensured by transparent, authentically printed glass windows and elaborately realised façade details. The fully realised interior also inspires with many details that become visible when the movable walls are opened up.
