

Item no.: 365799

Revell Aqua Color Brown, matt, 18ml, RAL 8023, water-based model paint, from 8 years old

from 2,60 EUR

shipping weight: 0.10 kg Manufacturer: Revell

Product Description

The popular Aqua Color paints are now available in all 88 colour shades. The model builder no longer has to make any compromises and can use this acrylic colour system for all his colour needs.

Revell Aqua Color paints in completely new 18 ml containers are ideal for use:

- · Colours can be diluted with water
- Colours have a mild odourPaints are non-flammable
- Paints contain practically no organic solvents
- 88 different colours
- Colours can be mixed with each other
- The paint is completely dry after 2 to 3 hours
 A colour can be painted over after only one hour, i.e. 6 times faster than with the enamel colours
- The new colours and the existing enamel colours (14ml) can be painted on top of each other without any problems after the drying time has elapsed, but they cannot be mixed with each other

Suitable for airbrushing:

- The paint must not be diluted too much
- Dilute a maximum of 20 to 25% with water
- It is best to dilute the paint with Aqua Color Mix. This serves, among other things, as a drying retarder and prevents the paint from drying too quickly in the spray gun
 Clean the spray gun with water immediately after use
 If the paint has already dried, the spray gun can also be cleaned with Airbrush Clean or Aqua Color Clean

Apply with a brush:

- The colours are brushable
- Smooth surfaces after brushing almost as good as with airbrushing
 Final result absolutely comparable to enamel colour paints
 Exceptional results when brushing

Caution. Not suitable for children under 36 months. Legal minimum age: 8 years

- Brown, matt
- 18 ml
- RAL 8023
