from **2,97 EUR**

shipping weight: 0.10 kg Manufacturer: Revell

Product Description

Revell Contacta Clear is the ideal crystal clear adhesive for all modellers looking for a transparent and invisible bond on clear parts such as windows and cockpit canopies. This water-based adhesive is suitable for various types of plastic and dries with high transparency, giving your models a professional and flawless appearance. The advantages of Revell Contacta Clear at a glance:

- 1. High transparency: when dry, Revell Contacta Clear offers high transparency, which is ideal for invisible bonding of clear parts

- Versatile: The water-based adhesive is suitable for various types of plastics and can be used in a wide range of modelling projects
 Easy to use: The brush included in the bottle lid makes it easy to apply the adhesive in a thin layer on both sides of the parts to be bonded
 Perfect for clear parts: Revell Contacta Clear is specially formulated for bonding clear parts such as windows and cockpit canopies to ensure a flawless appearance
 Clean joints: Thanks to the easy application and high transparency of the adhesive, you can achieve clean and precise joints, with no visible glue residue

Revell Contacta Clear is the perfect choice for modellers who value maximum transparency and clean joints on transparent parts. This special crystal clear adhesive gives your models a professional and flawless appearance.

Caution. Not suitable for children under 36 months.
