Product Description

Even the proportions of this technical marvel are reminiscent of a racing car. Well-packaged, two electric motors are hidden in front of and behind the driver, the V8 engine with its 608 hp is located in the rear. The 918 turns out to be a thoroughbred super sports car with racing approval, which, however, thanks to the innovative drive technology only has consumption values of mid-range cars. The performance figures are typical of Porsche: from 0 to 100 in no less than 2.6 seconds, top speed 345 km/h.
