Tool, line engraver

from **9,52 EUR**

Item no.: 365623
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

The line engraver is the ideal tool for anyone who wants to create authentic sheet metal joints in their models. This special tool can be used to engrave precise lines in a variety of materials, such as metal, plastic and even wood.

It allows you to create realistic and authentic surface textures, such as sheet metal creases or grooves, on your model. The tool head is made of high quality steel and allows precise control of the engraving.

This tool is ideal for modellers and hobbyists who have high demands on the precision and quality of their work and is particularly suitable for complex models or detailing work.

With the line engraver you have a tool that allows you to create authentic and realistic surface textures that would otherwise be difficult or impossible to achieve.

It is perfect for creating sheet metal creases, ridges, lines and other authentic surface textures that are essential for realistic and believable models. The line engraver is also a useful tool for any modeller who specialises in detailing vehicle models.

With the line engraver you have a tool that allows you to take your models to the next level and create authentic and realistic surface textures. It is an indispensable tool for every modeller who has high demands on the quality and realism of his models.
