Guard rail, 20 m

from **50,84 EUR**

Item no.: 364905
shipping weight: 0.70 kg
Manufacturer: Carrera

Product Description

The ideal boundary for curves

Guard rails are mainly found in curvy sections of the Carrera racetrack. In hard-fought curves, it is necessary to replace them with new ones over time. But maybe you just want a new look for your crash barriers. No matter what the reason: with this 20-metre roll, you always have enough tape for the crash barriers. The material is flexible, easy to work with and can be cut to the desired length. The accessories have the typical Carrera design - the logo and colours are instantly recognisable from the cult brand. The guard rail is suitable for 1:24 scale slot car tracks and is therefore ideal for DIGITAL 124, DIGITAL 132 and Carrera EVOLUTION. Guardrail holder, end pieces and connectors are not included.

- Individually customisable crash barrier
- DIGITAL 124, DIGITAL 132, Carrera EVOLUTION
- To embellish your racetrack
- Length: 20 m
