FS-DIN - Insert - For Dinosaur Island Extreme Edition and Expansion: Totally Liquid Extreme Edition

from **12,50 EUR**

Item no.: 336936
 shipping weight: 0.50 kg
 Manufacturer: Folded Space

Product Description

Insert - For Dinosaur Island Extreme Edition and Expansion: Totally Liquid Extreme Edition

The insert is compatible with Dinosaur Island Extreme Edition and its expansion Totally Liquid Extreme Edition.

The design provides both efficient storage and improved game play. Many of the trays can be utilised during the game and they greatly aid set-up and clear-away times. The rules and boards act as a lid on top of the trays. If you own both sets you will need two inserts to store them.

The insert is in two layers. The dino recipe tiles are stacked in a top corner and the player and game boards are on top of each other in the bottom of the box.

The insert works well with the regular retail version of Dinosaur Island, however it is not ideal for the Delux edition version as the metal coins it contains are too thick for the coin trays.

There are trays for the dinosaurs and cards, and for the player pieces. The tray for the dinos was made as large as possible to make it easy to store either the regular triceratops pieces, or the full KS selection of species. There is space for all cards to be sleeved. Furthermore, each player has their own separate tray for their pieces.

There are other trays for the remaining game components. There is a tray for storing all visitor meeples (prior to them being placed in the bag), and a tray for storing the VIP visitors and the dice. There is a large tray for vertical storage of the lab upgrades, paddocks, and attraction tiles. Then there are two separate trays for storing the metal coins, also vertically for ease of access. One tray can be placed on either side of the table.

The two coin trays can be assembled in one of two ways: either for vertical storage of the metal coins or as a simple box for storing the card coins from the game. Note that if the metal coins are used there is not then another storage space for the card ones, and these would need to be kept elsewhere.

As mentioned above many of the trays can be used during the game to organise the components and make access by all players easy.

For this insert the game boards go on the bottom and the insert trays on top. Once all trays are placed inside, next goes the rulebook. After this should go the visitor bag, with the knots from the string tucked into the spaces. Lastly the fast pass wrist band is placed over the string. The box is then fully loaded, and the lid will close flush and the game can be stored vertically.

The insert does have space for the "create your own" attraction and lab upgrade cards, but it does NOT have space for the slang tokens and three "create your own" dino recipe tiles. These would need to be stored separately in an insert in the Totally Liquid box. The KS pogs do not have a slot in the inserts. This insert works equally well in the Totally Liquid Extreme Edition expansion.

Attention! Not suitable for children under 36 months.

Note: It is designed for games with external box dimensions of 29.5 x 29.5 x 7 cm.

This product consists of a flat-pack of 4x Evacore sheets. The trays require assembly, which is quick and fun, using ordinary PVA glue. Detailed instructions are included in the package.

Attention: The game must be purchased additionally. The content of the trays on the pictures is not included!

- Gross weight: 500 g
- Packaging dimensions: 25.5 x 35.5 x 2.2 cm
- Material: Evacore sheets
