from **32,09 EUR**

Item no.: 340206
shipping weight: 0.50 kg
Manufacturer: UGEARS

Product Description

Tractor - 97 Components

The tractor or the tractor engine, which heralded a new chapter and age in agricultural production with the invention of the steam engine, was equally symbolic of its industrialization. The all-purpose weapon used for tillage, fertilization and feeding is rather a power machine that should ultimately replace the old field work. The viewer is immediately aware that speed is not an issue at all with this device. The brute expression of powerful machine technology is also the focus of UGEAR's new tractor kit.

In this context, the UGEARS models, which are powered by a rubber drive, symbolize the technical masterpieces of the past centuries, including the tractor. The appearance, reduced to technical forms and structures, uses the style of steampunk and creates machine work to watch through its semi-open design. Likewise, the still life pays homage to the technical age. This began with the construction of the steam engine. With 97 wooden components, the machine model becomes a small work of art in every closet or on the office table.

Warning! Not for children under 3 years.

- Number of components: 97
- Setup time: 2-3 hours
- Model size: 20.1 x 8.7 x 13.7 cm
