from **37,36 EUR**

Item no.: 340219
shipping weight: 0.50 kg
Manufacturer: UGEARS

Product Description

Mechanical Flower - 101 Components

The idea that a flower functions exclusively in a biological way may sometimes prevail as a thought in many people's minds, but it does not correspond to reality at all. For example, the respiratory chain of the leaves works in a biomechanical way, which, by the way, also applies to the opening and closing mechanism of a flower calyx. In this context, UGEARS(R), as a brand manufacturer of high-precision wooden works of art, has come up with something completely new and offers its clientele a superlative eye-catcher in the form of the "Mechanical Flower" kit.

The flower, as one of the most beautiful visual objects, has an effect here through its form alone, as a formative art style matures with the help of an approximately 100-piece model kit. Steampunk models, such as the "Mechanical Flower", therefore rely solely on the form and thus highlight the technology in the foreground. The opening mechanism of the petals is thus a silent homage to the plant world, in whose flower interior could be hidden a gift like an engagement ring. The mechanical marvel in the style of retrofuturism can hide any secret admiration in addition to jewelry. As an art object, UGEARS(R) still life is at the top of the list of wooden beauties.

Warning! Not for children under 3 years.

- Number of components: 101
- Setup time: 1-2 hours
- Model size: 13 x 13 x 16 cm
