Product Description

Safe - 179 Components

A safe always reflects the personal security needs of its owner. If, as in this case, it is a realistic replica of a safe, its value is to be sought on a completely different level. Rather, the mechanical models from UGEARS appeal to the tech-savvy target audience by focusing on the technology of the replica.

The safe thus specifically addresses the technical know-how of its interested parties, who create an artistic still life from a kit of 179 individual wooden parts. With an individual three-digit number code, the retro-futuristic work of art becomes a homage to the days of bank robbers. What should not be missing is a realistic algorithm that uses a stethoscope to turn the code of the combination lock into a crime thriller à la Olsen Gang and tries to crack it. This is by no means about the money, but about the nostalgic paintwork of the stylish break-in, which plays a little with the gendarmes. The UGEARS kit is thus a showpiece in steampunk style and a memorable work of art of the safe cracker, a robber with style.

Warning! Not for children under 3 years.

- Number of components: 179
- Setup time: 6-7 hours
- Model size: 19.6 x 18.5 x 17.6 cm.
