Product Description

Dazzling Steamline - 256 Components

Railroad romance with a touch of steampunk - this is what perfection looks like. We all sometimes want to ride in a brand new train and dream. In its time, steam trains became not only part of the industrial revolution, but also a kind of traveling works of art. Just look at the immaculate aerodynamic body of our Dazzling Steamliner and you will hear the rhythmic roar of the engine, the whistle of steam and the distant beeps of locomotives. The model works with a mechanical spring. From above and from the side you can see how the gears and flywheels move inside. The tender can be disconnected from the locomotive and the engine can be turned on and off.

Warning! Not for children under 3 years.

- Model size: 51 x 7.1 x 6.2 cm
- Number of components: 256 pcs.
- Instructions in: English, German, Spanish, French
