Product Description

Flexi-Cubes - 144 Components

The UGEARS Flexi-Cube is a mini mechanism, which consists of a total of 8 interconnected pieces. The flexibility between the pieces allows each piece to be moved to create different geometric shapes.

Each piece is in itself a mini mechanism, which includes six segments with swivels. This geometric anti-stress toy first takes the shape of a rectangle, and then the movable mechanisms allow it to be moved in any direction - as many times as you want.

Warning! Not for children under 3 years.

- Number of components: 144
- Setup time: 1-3 hours
- Model size: 11.5 x 6 x 2.8 cm
