Product Description

Foldable Phone Holder - 73 Components

Following the modern trend of minimalistic and functional design, Ugears is proud to present a new clever and practical addition to their collection of wooden mechanical models, the Foldable Phone Holder of the Mini-series.

Clean lines and functionality coupled with Ugears iconic design was the main ground on which the idea of the foldable phone stand was born and developed. Remaining loyal to natural materials and all-you-need in a box approach, Ugears designers created a wooden model that is not just a fun 3D-puzzle or DIY project, but also a useful companion in your daily activities. Besides Foldable Phone Holder is a perfect gift idea.

Mobile phones have become a large part of all aspects of our lives – they are both indispensable business assistants and all-in-one entertainment gadgets. Whether it is an important conference call when you need your hands free or a couple of relaxing minutes browsing through funny cats videos, the Foldable Phone Holder is here to make your experience more convenient and pleasant.

This desktop cell phone stand has an adjustable support angle offering three convenient positions. It provides extra-support for larger phones. Position can be adjusted by turning the central wheel at the fold. To prevent sliding and ensure your phone sits in place, the back stand is equipped with two rubber bands. The Holder is perfect for travel: it neatly folds down to a portable size and can fit in a bag or even in a pocket.

The portable, stable, and universally compatible Foldable Phone Holder is waiting to become your reliable partner in business and fun.

Warning! Not for children under 3 years.
