Product Description

Playmat Tube - black

Keep your playmats organized and protected. The Playmat Tube provides a secure storage solution for stitched and unstitched playmats in vibrant, semi-transparent colors. A hexagonal shape keeps the tube from rolling around on the table. The cap is made out of a flexible material and can be easily taken off, whilst still creating a tight seal to prevent the playmat from falling out accidentally, even when shaken.

The Playmat Tube is made from shock- and scratch-resistant PETG and has a reinforced base to withstand heavy pressure.

Attention! Not suitable for children under 36 months.
