Product Description

Splittermond: State Cards, Role-Playing Game, (DE Edition)

With this set you get 110 double-sided cards for the role-playing game Splittermond. These cards show all the conditions and their effects on the rules, so that in future you will have all the factors influencing your adventurer in front of you at a glance.

In addition to the states, other modifiers that influence combat are also represented on the cards, including combat positions, tactical advantages and lighting conditions.

Simply place the corresponding condition card next to your character document and you can read how your adventurer's stats are modified at any time. Level cards help to keep track of the exact level of the corresponding states.

There are also several other game aids in this set, including overview cards for success level use when casting spells or for Active Defence. Especially for inexperienced groups, these can help to keep an eye on the rules at all times.

This set contains everything you need to handle battles in Splittermond even faster and more clearly and to avoid tedious leafing through the rulebook.

Caution. Not suitable for children under 36 months.

- Age: from 12 years
- 110 double-sided printed cards
