Viking Modern Dice Set: Niflheim

A treasure from the other side. We give you these uncompromising dice with a touch of Norse Mythology, like an ancient ring found in the cold and dark World of Mist. The Viking-style engravings surround digits written in an old runic font, making the dice mystical and appealing. The copper painting on a misty background brings to mind Viking's ships in a dense fog of the Northlands.

In Viking culture, Niflheim is the realm at the roots of the World Tree, the Yggdrasil. It is the domain of Hel, the ruler of those dead people who perished in a cowardly manner – those who were unlucky enough to not fall in a glorious battle, weapon in hand. Niflheim was a realm of dreadful, bone-chilling cold, and its deep darkness was only diversified by impenetrable fog that enveloped everything. Demons, against whom the Vikings felt a superstitious fear, were also occupying this realm. Meeting one's end in Niflheim was the worst fate that a warrior could imagine after their death.

It is unquestionably right to call the new Modern Viking Dice Set by this realm's name. First of all, the copper engravings are reminiscent of the old jewelry put in the ground with the deceased, and the misty-colored material further enhances the impression of Niflheim's ominous atmosphere. Secondly, the remarkable legibility of the digits surrounded by immersive patterns inspired by Viking ornaments is full of mysticism and extremely straightforward at the same time.

Just like our first set of polyhedrons from this line – Viking Dice Set: Valhalla – this one also refers to Norse mythology and culture. But that doesn't mean its only calling is to be used by brash warriors! It will also work just as well for a necromancer who raises his minions, a sailor lost on the high seas, a researcher of supernatural phenomena, or a rogue sneaking up on his target in the morning mist!

Niflheim is a terrifying vision of the final defeat for a Viking warrior... but you have all the might of this realm in your hands! As its piercing cold scares off even the most persistent adventurers, the legible digits will be a source of infinite power for you. As the fog envelops everything and causes the wandering souls of the dead to lose their way, the misty material of the dice will be a chance for a surprise attack for you. As copper ornaments will seem raw to others, these engravings will be tools filled with magic for you. You will rule over life and death in every game you play – why be afraid of going to Niflheim if you hold its secrets in your hand?

- Geared-up for battle — The set consists of 7 polyhedral dice, with a rounded Modern D4.
- An ominous mist — The color theme for this set is a misty background with copper engravings.
- Runes of glory — The engravings on the dice present digits kept in old runic font style.
- A nordic style — The dice faces are adorned with patterns, weaves, and symbols inspired by Vikings' ornament style.
