from **36,15 EUR**

Item no.: 358691
 shipping weight: 1.40 kg
 Manufacturer: COBI

Product Description

During its first maiden voyage on the night of 14 to 15 April 1912 on the Southampton-Cherbourg-Queenstown-New York route, the British ocean liner R.M.S Titanic collided with an iceberg and sank. This accident is one of the most famous maritime disasters and still arouses great emotions. There were around 2,228 people on the ship during the ill-fated voyage. It was 268.99 metres long and 29.41 metres wide. It was a true marvel of technology at the beginning of the 20th century. The block model of the ship consists of 722 COBI building blocks. When built, it is 64 cm long and 15 cm high. Numerous details reproduce the 1:450 scale and faithfully reproduce the shape and form of its legendary prototype. The set contains moving parts. This edition was equipped with swivelling wheels mounted in the flat bottom of the ship. With their help, the ship can "float" on flat surfaces such as the floor, carpet or table. Thanks to this solution, the collector's model also becomes a toy. You can also move cranes, screws and rudders. The manual uses a system of simple symbols and pictograms to guide you easily through the building process. The block model of the Titanic does not need to be glued or painted. All graphics and lettering are applied to the blocks in the form of very durable prints that will not wear off or fade under the influence of sun, water or even very intense play. No stickers were used in the model. The set is dedicated to people over 8 years old. It will certainly bring a lot of satisfaction to the youngest fans of blocks as well as adult history and sea lovers. The R.M.S Titanic model will certainly look spectacular on the collector's desk as well as in the room of every teenager and child.

Details- Scale: 1:450- Recommended age: 8 years and up- Wheels for easy modelling play
