## Check Lane for sector measurement and slot car performance

from **25,84 EUR**

Item no.: 362955  
shipping weight: 0.60 kg  
Manufacturer: Carrera

### Product Description

Not only the lap time, but also the sector time is decisive

Fastest in sector 1, but lost the advantage over your opponents in sector 2? It's not only in Formula 1 that you can check where you can still get a few tenths out of, this is now also possible on the Carrera track. The Check Lane in conjunction with Carrera App Connect (20030369) and the Carrera Race App ensures accurate split time measurement on your track. With one Check Lane you have two sectors, with two Check Lanes three sectors. This means that the driver can keep a close eye on every section of the track and knows exactly where he can still improve. The performance of the vehicle can also be measured.

Only in conjunction with Carrera App-Connect #20030369 and the Carrera Race App!

- Check Lane for sector measurement and slot car performance
