Slot car, Chevrolet Corvette C8.R "No. 3", from 10 years old

from **79,03 EUR**

Item no.: 364543
shipping weight: 0.80 kg
Manufacturer: Carrera

Product Description

The unmistakable Chevrolet Corvette C8.R is now also shooting through the living room on the Carrera circuit. In 1:24 scale and with original GM licence, it is a real eye-catcher in the Carrera racing stable. The Chevrolet Corvette C8.R "No. 3" has been converted from front- to mid-engine for even more performance on the race track! The Corvette's 5.5-litre naturally aspirated V8 engine produces 500 hp and a maximum torque of 650 Nm. The C8.R is built on the strong foundation of the 2020 Corvette Stingray. With the number 3, it appears in the traditional colours of the successful GTLM racing Corvettes - yellow with silver accents and a red number 3. The livery pays homage to the history of Corvette Racing as well as the impressive milestones in engineering and design that have led to this exceptional race car. Decide the race for yourself and bring the racer safely through the finish line!

Everything about America's most iconic sports car is different from its predecessor - improvements in aerodynamics, weight and rigidity set the new mid-engine race car apart. On the DIGITAL 124 Carrera racetrack, the Chevrolet Corvette C8.R "No. 3" makes its debut and races away from its competitors! Equipped with front and rear lights, as well as brake lights, it can reach its top speed on the track without being overlooked. The car can be individually coded, digitally controlled and offers real driving fun. The yellow and black Corvette is an absolute eye-catcher on any race track!

Attention: not suitable for children under 36 months!
