Product Description

GeoPuzzle makes geography fun! The puzzle pieces are in the shape of individual federal states - so you can playfully explore Germany while doing the puzzle. Where do the Bremen Town Musicians actually live? Or are there beach chairs in Bavaria? Is Munich the capital of Bavaria or rather of Saxony? On the journey of discovery, not only the names and capitals of the individual federal states are explored, but also the sights, coats of arms and geographical location in Germany. And when putting together the cheerfully designed puzzle, children can "grasp" Germany country by country.

Caution! Not suitable for children under 36 months.

- Age: 4-10 years
- Parts: 51
