Product Description

Organizer for Great Western Trail, Board Game Box

Clever management, organization and timing determine whether you are successful as a rancher or not. So that you and your fellow players can concentrate fully on the ranches and herds, we have taken care of the management on the game table.

With this Feldherr Organizer Set made of sturdy plastic - well thought-out and tailor-made for the core game - you not only keep the box tidy. All trays come directly from the box to the game board and save valuable time and nerves.

- The organizer provides space for all components from the "Great Western Trail" core game by eggertspiele.
- The game board and the four player boards are placed on top.
- All cards also fit into the trays with sleeves.
- No assembly required. All parts are ready for immediate use.

Save yourself time-consuming sorting and arranging of tiles, cards and accessories at the beginning of each game. With the Feldherr cardholders and the token box everything is now compactly stowed away and always where you need it. From the job market token to the engine - every tile, marker and card gets the right compartment. This also makes it easier for you to sort them back in after the game.

You always find what you need immediately and thanks to individually designed compartments, you can see directly if a tile is missing. At the same time the game material is reliably protected against kinks and other wear and tear.

At the beginning of the game, you simply take the token and card holders, together with the filled fabric bags, out of the box and distribute them on the gaming table. You will have more time for the game and who knows, maybe your cattle will arrive in Kansas more relaxed.

Fill the bags with the piles 1, 2 and 3 so that you can store them pre-sorted in the game box and use them to draw the individual tiles during the game.

Three foam mats complete the set. One serves as a base so that nothing rattles or slips. A second mat serves as a lid over the card holders, the token box, filled cloth bags and the scoring block.

Finally, put the game board, the player boards, and the rulebook on top of it. The third mat seals this organizer set.

As with all 3D-printed models, minor imperfections may occur. The product images are only examples of how the finished product may look. Colors may vary.

Attention! Not suitable for children under 36 months.

The value set contains:

- 1x plastic token holder + lid as bank
- 1x plastic card holder for objective cards and building tiles
- 1x plastic card holder for market cattle cards and building tiles
