

Item no.: 370842

500907155 - Model component, 1:14 aluminium fifth wheel SAF (MFC)

from **74,18 EUR**

Item no.: 370842
shipping weight: 0.20 kg
Manufacturer: Carson

Product Description

Add even more detail to your truck.

The aluminium fifth wheel is officially licensed by SAF Holland GmbH and fits all TAMIYA trucks in 1:14 scale. The assembly of the fifth wheel is easy to do, there is a 1:1 exchange. If you use the TAMIYA multi-function unit MFC-01 or MFC-03, the microswitch for the "coupling noise" can be easily mounted at the place provided for it. If you do not use a multi-function unit, the locking device included in the kit is used here. The inserted sliding pads add another point of functionality and detail to the model.

Attention! Not suitable for children under 3 years. Choking hazard due to small parts.

Special features

- Aluminium fifth wheel suitable for TAMIYA trucks
- Fits the MFC, prepared to take the micro-switch for the "coupling sound"

Details

- Age recommendation: from 14 years
- Contents: aluminium fifth wheel, auxiliary/mounting frame, sliding pad, spring, small parts
