50,31 EUR

Item no.: 370824
shipping weight: 1.00 kg
Manufacturer: ITALERI

Product Description

King of the road! In 2005, the Scania R-series heavy trucks replaced the 4 series. The R trucks meet the highest demands for fuel economy and reliability, and Scania engines stand out for their performance, robustness and efficiency. The V8 engine of the top-of-the-line R730 has an output of 537 kW at 1,900 rpm. The striking design gives the Streamline show truck an imposing appearance on the road. Swedish manufacturer Scania is not considered the number one in show trucks for nothing. The exceptional styling of the exterior is combined with exclusive interiors that offer comfort for the driver and a wide range of colour and material options. The Italeri kit contains many chrome-plated plastic parts that make the R730 look particularly realistic. The kit is complemented by extensive decors.

Attention: not suitable for children under 36 months!

- Scale: 1:24
- Age recommendation: from 14 years
- Contents: kit, decor, instructions
