from **28,80 EUR**

Item no.: 369967
shipping weight: 0.80 kg
Manufacturer: ITALERI

Product Description

The V-22 Osprey is a revolutionary new aircraft that can be considered both a helicopter and a conventional aircraft. It is currently undergoing troop trials with the U.S. Navy and the U.S. Marines, who are currently testing the flight characteristics of the helicopter pilot. Thanks to its extra-large swivel rotors, the Osprey is able to take off and land like a helicopter. Once in the air, the rotation of the engines gives it a speed and range previously unattainable for helicopters. V-22s are intended to replace the ageing CH-46s as transport and combat helicopters in the Marines and are also expected to become standard equipment in the Special Forces.

- Detailed 1:48 scale model kit
- The high quality kit from Italeri has to be assembled by yourself
- The self-assembly is accompanied by step-by-step or illustrated assembly instructions. The assembly instructions are of course included in the delivery
- Based on the assembly instructions, the precisely fitting individual parts must be assembled. The parts can be painted according to your own ideas
- Tools, glue and paint are not included in the plastic kit. These must be purchased as an option

Attention! Not suitable for children under 36 months!

- Scale: 1:48
- Size: 289 mm
- Contents: Kit, Instructions, Decal
