from **62,52 EUR**

Item no.: 370827
 shipping weight: 1.00 kg
 Manufacturer: ITALERI

Product Description

Scania's S-series heavy-duty commercial and industrial vehicles are designed to meet the demands of long-distance logistics and transport. The new S-series was launched by the Scandinavian manufacturer in the second half of the last decade with numerous innovations. Through the use of state-of-the-art control and driver assistance systems, particular emphasis was placed on active and passive safety during development. The new vehicle design improves the aerodynamics of the vehicle and thus enables a reduction in fuel consumption. In order to increase the driver's comfort, the cabin in particular has also been optimised. The "Highline" version of the S730 with the extra-large cabin meets the requirements of modern long-distance transport to a special degree.

The high-quality kit from Italeri has to be assembled by the customer. The self-assembly is accompanied by step-by-step and illustrated assembly instructions. The assembly instructions are of course included in the delivery. Based on the assembly instructions, the precisely fitting individual parts must be assembled. The parts can be painted according to your own ideas.

Tools, glue and paint are not included in the plastic kit. These must be purchased as an option.

Caution! Not suitable for children under 36 months.
