### Product Description

This 1:48 scale model of a German half-track vehicle is a replica of the Sd.Kfz. 251 of the D version. This model has a length of 12.6 cm and includes 2 figures in addition to the vehicle.

The Germans realised early on that supply as well as mobility were the main variables in the economic drive, with regard to military conflicts. To realise this, a number of vehicles were developed for this purpose, including the Sd.Kfz 251.

The half-tracks could travel over difficult terrain and easily tow various types of trailers and cannons. The vehicle could be seen on every front due to the half-track drive and could accelerate to 53 Km/h with the help of the drive.

Caution. Not suitable for children under 36 months. Choking hazard due to small parts.
