Product Description

The floor model is a replica of the Classic US Western Star Truck. Western Star began designing and building industrial vehicles in 1967. From the beginning, the Western Star product range was a good synthesis of the "ideal" American heavy-duty truck. In particular, the trucks designed to carry out highway transport remain the benchmark in the Western Star range. The American manufacturer specialises in "customised" engines, transmissions and frames, as well as tailor-made trucks to meet specific customer requirements. However, customisation does not end with the factory technical configuration. In most cases, the passionate drivers equipped their trucks with a wide range of accessories and chrome-plated parts that make them unique and authentic "masterpieces" on wheels.
