Product Description

The floor model is a replica of the NSU HK 101 "Kettenkrad". In the beginning, Sd.Kfz 2 "Kettenkrad" was developed as a light means of transport for airborne troops. It was a small vehicle whose front resembled a motorbike and was distinguished by its handlebars and central wheel as well as a rear equipped with a 6-wheel track structure. The Kettenkrad could carry 2 passengers in addition to the driver or transport goods and ammunition. Later, since 1944, it was used on runways to handle jet fighters Messerschmitt Me 262 and jet bombers Arado A-234. Caution! Not suitable for children under 36 months. Choking hazard due to small parts.
