from **33,11 EUR**

Item no.: 358722  
shipping weight: 0.60 kg  
Manufacturer: COBI

### Product Description

The Sd.Kfz.251 is the basic armoured half-track personnel carrier of the German Army during World War II. Production of various versions ran from 1939 onwards. Other combat vehicles were also built on its basis. One of these was the "Stummel", which was equipped with a short-barreled 7.5-cm Stu.K.37 gun in 75 mm calibre and was designed as a fire support vehicle. The first vehicles of this type were built in 1942.

The "Stummel" armoured personnel carrier was developed in 1:35 scale to match the rest of COBI's Historical Collection. The model consists of 485 high-quality elements, including building blocks with durable prints. Particularly noteworthy is the beautifully detailed building block camouflage. The vehicle is equipped with movable wheels with real tyres. The chain traction consisting of realistic block connections works and behaves like a real one when the vehicle is moved. The opening rear door, cannon and other accessories make the transporter even more attractive. The whole set is completed with a figure representing an armoured grenadier with double-sided prints and a brick with the name of the vehicle. If you like to build your own constructions with KLEmbau bricks, this vehicle is the perfect base to create other versions of this popular transporter! Fans of history and military technology will find what they are looking for here!

Not suitable for children under 36 months.

- 485 high quality elements,
- manufactured in the EU by a company with over 20 years of tradition,
- meeting safety standards for children's products,
- fully compatible with clamp blocks of other brands,
