from **49,34 EUR**

Item no.: 358689
shipping weight: 1.10 kg
Manufacturer: COBI

Product Description

The Grumman F-14 TOMCAT is an American supersonic jet. Its distinguishing feature is the variable geometry of the wings. The fighter was developed and produced by the Grumman Corporation Label. The assumptions were to defend the fleet by air superiority. It was also used to conduct tactical reconnaissance. Later modifications enabled the transport of bombs for ground attacks. The F-14 entered service with the United States Navy in 1972. The main user was the United States. In 1976, 79 aircraft were exported to Iran, some of which are still in service today. The aircraft was officially retired from US Navy service on 22 September 2006. The F-14 TOMCAT fighter became famous not only because of its amazing appearance, its variable wing geometry, but also because of its participation in the already iconic 1986 film TOP GUN. The main character of the film Maverick (Tom Cruise) is a TOMCAT F-14A fighter pilot! The F-14 TOMCAT is a unique aircraft model released under the original licence of TOP GUN™ and NORTHROP GRUMMAN. The legendary US Navy film pilot Pete "Maverick" Mitchell and his partner "Goose" fly such a two-seater. If you return to this cult film production, you can now build your own F-14 in 1:48 scale. The model has been faithfully reproduced with 754 COBI building blocks. The set contains high-quality prints that faithfully reproduce the original design of the film machine. The model has swivelling wings with variable geometry, a retractable undercarriage and rotating wheels. There is a large armoury under the wings. The cabin contains two figures of the film pilots included in the set. Their seats are marked (Maverick & Goose)! The figures reflect the appearance of the film's heroes and are equipped with characteristic helmets and oxygen masks. The set also includes an elegant block stand and a plate with the name of the aircraft and the film's logo. This exclusive, licensed set is certainly a great idea for an original gift for anyone, regardless of age, for film, aviation and military fans. The aeroplane will look perfect in an elegant study or a teenager's room. Warning: not suitable for children under 36 months!

Details- Scale: 1:48- Age recommendation: from 7 years- No. of parts: 757 Dimensions- Length: 385 mm- Width: 270 mm- Height: 105 mm Contents- Building kit- Instructions- Two figures of pilots- A display stand and a nameplate Information- Made in the EU by a company with over 20 years of tradition- Meets the safety standards for products for children- Fully compatible with other building block brands - Compatible with other building block brands Fully compatible with other building block brands- Blocks with prints do not deform or fade during play or under the influence of temperature- Clear and intuitive instructions based on drawings and symbols- Model under original licence from TOP GUN™
