from **28,26 EUR**

Item no.: 370780
shipping weight: 1.00 kg
Manufacturer: ITALERI

Product Description

The Mercedes-Benz 190E, introduced in 1982, marked a turning point in the production of the renowned Stuttgart-based car manufacturer. Although the so-called "190" was the entry-level version of the Mercedes-Benz product range, it nevertheless contained important stylistic and technical innovations. Its design, with a successful blend of style and elegance, also influenced the cars in the higher segments of future Mercedes-Benz production. From a technical point of view, the "190" was ahead of its time: longitudinally mounted front engine, rear-wheel drive and disc brakes on all four wheels, McPherson independent suspension with coil springs at the front and a space-link rear suspension. The first "190s" were available with two different petrol engines: with carburettor or in the 190E version with fuel injection. Shortly afterwards, the 2.3 16V sports version was introduced, which was also used in sporting brand competitions such as the "Nürburgring Champions Race Cup" in 1984, in which famous drivers of the time took part. - The high-quality kit from Italeri must be assembled by the owner. - The independent assembly is accompanied by step-by-step or illustrated assembly instructions. The assembly instructions are of course included in the delivery. - Based on the assembly instructions, the precisely fitting individual parts must be assembled. The parts can be painted according to your own ideas. Caution: Not suitable for children under 36 months. Choking hazard due to small parts.

- Contents: Kit, instructions, decor- Length of the model: 184 mm- Age recommendation: 14 years and older
