from **48,15 EUR**

Item no.: 363901  
shipping weight: 0.10 kg  
Manufacturer: Carrera

### Product Description

In the eleventh part of the popular Mario Kart™ racing game series, Luigi really heats up the tracks and his opponents with his turbine-shaped racing car. Together with his friends and old acquaintances, he races around the tracks in the water park, in Bowser's fortress and in the bone-dry dunes, for example. Now Mario's brother can do his rounds in your home too!

Thanks to the Nintendo licence, Luigi in his vehicle with the blue and yellow Mach 8 design looks as if he had made his way straight from the racetracks in Mario Kart 8™ to your children's room. In addition to the authentic look, the 1:18 scale RC car also impresses with its full function technology and differential gear. Luigi's dynamic movements also provide even more fun. With a top speed of up to 9 km/h, he heats through the children's room and casually lies down in the respective direction of travel. When Luigi arrives at your house in his remote-controlled car, you can set off on new adventures with him. The vehicle is 25.5 cm long and can be driven for up to 20 minutes. After that, the video game hero takes a breather of about 50 minutes, then the battery is recharged and you can continue. You want to have some exciting duels with your friends? No problem! With the 2.4 GHz technology, it is possible for up to 16 vehicles to race at the same time. Will it be enough for you and Luigi to win?

- RC vehicle with full function technology for beginners
- Onroad
- Dynamic figure movement: Luigi lies down in the respective direction of travel
- Scale: 1:18
- From 6 years
- Charging time: 50 min
- Driving time: 20 min

Attention! Not suitable for children under 36 months.
